T1 AND T3

*Have you checked into reducing your overhead with competitive rates on long distance? Would you like to assure customer satisfaction with reliable inbound and outbound service? Go global with low international calling charges?*

*With the Total Advantage program, not only will you get great rates on your intrastate, interstate and international toll calls, you'll also have access to sophisticated digital services including ATM, Frame Relay, PRI and T1 and T3 lines. Best of all, with Total Communications, you have the security of dealing with New England's largest privately-owned voice and data supplier.*

### LONG DISTANCE SERVICES

- Intrastate
- Interstate
- International
- Calling Cards

On intrastate, interstate, international and calling card plans, our rates are extremely competitive! Beyond competitive rates, we offer individual plans tailored to your needs and easy-to-understand statements.

### DIGITAL SERVICES

#### ATM

If you need to effectively connect dispersed sites, consider Total Advantage ATM. Total Advantage ATM transmits high-speed data, voice, video and Internet traffic over a single interface. ATM can inter-network with frame relay service, so you can migrate networks one location at a time, while maintaining complete connectivity. This fast-packet, cell-based transport and switching service offers significant savings over traditional network services and delivers speeds up to 155 Mbps.

#### Frame Relay

Get all the features and benefits of a private line network without the expense of multiple dedicated circuits with Total Advantage Frame Relay Service. This scalable service can be reconfigured quickly to respond to changing business

needs and has access speeds ranging from 56 Kbps to 1.544 Mbps. Our reliable Frame Relay is an industry-standards based technology that can be seamlessly integrated with ATM on a per site basis.

#### PRI

If you need a low cost, yet reliable digital connection, Total Advantage BRI service could be an ideal option. Total Advantage BRI uses a 1.544 Mbps digital trunk line, which connects your system and our computer-driven network - so you have all the benefits of a digital connection without the large investment. We can configure this service to you specific needs, with options like Direct Inward Dialing (DID), Incoming Caller ID and Alternate Data Capability (ADC).

#### Dedicated T1 & T3 Lines

Our Total Advantage Dedicated T1 and T3 lines allow you to combine voice and data traffic, link remote hosts and employ data intensive applications like videoconferencing. With our T1 service you can use the entire 1.544 Mbps for single high bandwidth applications or channel it into 24 separate DSOs for multiple uses. If you're already using multiple T1s, you can move up to Total Advantage T3 service, which operates at 45 Mbps and gives you a cost-effective way to consolidate all voice, video and data traffic on one line.

#### High-Speed Internet Access

Are you running mission-critical applications over the Internet? You need secure high-speed Internet access from Point to Point Access.com, Total Communication's business-to-business ISP division. If you've ever been frustrated by slow access speeds, you'll appreciate having a direct connection to the Internet via a dedicated point-to-point circuit. We also offer business-specific services such as web site hosting, managed e-mail and filtering/security software.

#### THE TOTAL DIFFERENCE

Established in 1980, Total Communications is the nation's 7th largest teleconnect company.\* Total Communications is a single source for telephone systems, data networking, local and long distance services and Internet services. The company is a Cisco Premier Partner and Avaya BusinessPartner. With 3 locations and 200 employees, we offer our 11,000 business customers throughout the Northeast individual, personalized service. Recently, Total has become a leader in converged voice and data networks and IP Telephony.
